## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, drawn to a method of identifying agents which increase or decrease processing of amyloid precursor protein into amyloid  $\beta$  peptides comprising contacting NT2N cells with the compound and measuring levels of amyloid  $\beta$  peptides.

Group II, claim(s) 2, drawn to a method of diagnosing Alzheimer's disease in a patient comprising detecting in the patient an agent identified to increase processing of amyloid precursor protein into amyloid  $\beta$  peptides found in neuritic plaques and vascular deposits.

Group III, claim(s) 3, drawn to a method of inhibiting processing of amyloid precursor protein in the brains of patients with Alzheimer's disease comprising administering to the patient an agent which decreases processing of amyloid precursor protein into amyloid  $\beta$  peptides.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Werkin et al. (Proc Natl Acad Sci USA 90: 9513-9517, 1993) teaches a method of contacting NT2N cells with retinoic acid, which increases or decreases amyloid precursor protein processing. Werkin et al. renders claim 1, among the other, not novel. Thus, the technical feature of claim 1 is not a contribution over the prior art and is not considered a special technical feature under PCT Rule 13.1. Further, the PCT Rules only provide for

examination of the first claimed product, first claimed method of making that product, and first named method of using that product.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bridget E. Bunner whose telephone number is (703) 305-7148. The examiner can normally be reached on 7:30-4:00 M-F.
